Portfolio

**Summary**

Product design lead with 6+ years of experience driving enterprise product direction and AI transformation initiatives. Shaping long-term vision and development through strategic lens across US, European, and Asian markets.

## Experience 6+ years

**MathWorks**
Senior Product Designer
April 2022 — Present
Bangalore, India

MathWorks helps engineers and scientists build and simulate real-world systems.

**Achievements**

- Architected the MATLAB App Designer Copilot blueprint, scaling into MATLAB Copilot to serve 5M+ global users; awarded the Clippy Award for Best AI Innovation (2024–25).
- Directed UX strategy for Motor Control portfolio, launching a new flagship no-code Simulink suite for 1.1M+ users; accelerated simulation and catalyzed 80% revenue growth (2024).

**Product contributions**

- Led the OPC UA Explorer App as a greenfield innovation initiative to transition 130,000+ engineers from legacy industrial protocols to OPC UA standard.
- Engineered Claude-powered AI design workflows to standardize design outputs; slashing time-to-MVP by 50% for MATLAB development teams.
- Established UX guardrails for the $900M+ MATLAB/Simulink portfolio, unifying product workflows across global engineering teams.

**Team and community contributions**

- Mentoring a distributed team of 24 design and research professionals across three continents (US, Europe, and India).
- Steered the User Connect program, bridging 55 enterprise clients with product teams, securing long-term client commitments and driving product adoption.
- Co-led accessibility initiative, training 5,000+ employees with specialized curriculum to foster an inclusive software experience.

**Dream11**
Product Designer
July 2021 — March 2022
Mumbai, India

Dream11 helps sports enthusiasts engage with live matches through real-time fantasy gaming.

**Achievements**

- Defined UX strategy for Leaderboard verticals, shaping the core gameplay experience for 220M+ active users; contributing to $400M in business impact.
- Optimized in-game user retention by 37% through a one-click player substitution feature, streamlining the team management workflow.

**Product contributions**

- Led product roadmap for the React Native migration; overhauled cross-platform design systems to embed systemic compliance.
- Governed the Leaderboard design system strategy, streamlining execution workflows to enable high-velocity engineering feature deployment.

**Team and community contributions**

- Institutionalized the studio's mentorship and critique rituals, driving a high-growth design culture to raise collective execution standards.

**HealthPole**
Product Designer
April 2021 — June 2021
Pune, India

HealthPole helps medical and pharma providers integrate and scale clinical networks.

- Led zero-to-one UX for three mobile and two web apps; established core interaction guidelines and monetization strategies for Indian Doctors Network App.
- Architected core marketplace experiences for doctors, clinics, and pharma partners; unified multi-stakeholder transactional workflows.
- Standardized the multi-product design blueprint, optimizing development workflows to maximize engineering throughput and velocity.

**GMetri**
UX Fellow
Jan 2020 — April 2020
Bangalore, India

GMetri is a no-code metaverse platform building immersive spatial enterprise experiences.

- Architected a content repository framework to streamline 3D asset management and simplify spatial authoring workflows for creators.
- Designed immersive 360° VR training ecosystems, optimizing interaction models to elevate user learning retention from 40% to 95%.
- Developed gamified VR modules for e-commerce product demonstrations to increase user engagement and conversion.

## Education

- **M.Des in User Experience**,
  National Institute of Fashion Technology,
  Bangalore, India, 2018-2020
- **B. Tech in Electrical and Electronics Engineering**,
  College of Engineering Roorkee University,
  Roorkee, India, 2012–2016

## Additional information

### Publications

- Co-design of Physical Spaces with Neurodivergent Individuals – Springer, 2024
- Stability Analysis of Inverted Pendulum – IJETR, 2016

### Certifications

- IBM, Generative AI: Prompt Engineering Basics
- IBM, Generative AI: Introduction and Applications
- IDF, Accessibility: How To Design For All

### Live Products

- OPC UA Explorer, 2026
- Motor Characteristic Analyzer, 2025
- Motor Parameter Estimator, 2024
- Motor Hardware Configurator, 2024
- MATLAB Sonify, 2024
- IO Device Builder, 2023
- Dream11 Leaderboards, 2022
